Patients are urged to boycott trials that do not guarantee publication

This News story states that the Cochrane Collaboration backs the alltrials.net initiative, but the organisation has yet to officially sponsor the campaign (*BMJ* 2013;346:f106, doi:10.1136/bmj.f106). It also says that the Centre for Evidence-Based

Medicine is at Bond University, when it is in fact at the University of Oxford.
